

Hero Logistics System – Front-End Development Specification

Core Rule

Hero must follow this workflow across all panels:

Load → Stops → Items/Assets → Customer → Driver → Delivery → Invoice → Pay/P&L

Every panel should support this flow without breaking the operational chain.

Required Shared Features Across Panels

Niche Configuration

Hero must support:

- Car carrying
- General freight
- Dangerous goods

The front end should allow fields and wording to change depending on the selected niche.

Permissions

Every button must be permission-based.

Examples:

- Driver can create draft load only if enabled.
- Dispatch can assign loads but cannot complete delivery actions.
- Accounts can approve invoices but may not edit operational load details.
- Customer can view only their own records.

AI Confirmation

All AI actions must require user confirmation.

AI examples:

- AI Load Inbox
- AI receipt reading
- AI odometer reading
- Auto-filled asset details

Required buttons:

- Review AI Result
- Confirm
- Edit
- Reject

Start / Finish Work

These roles may need start/finish work:

- Driver
- Yard staff
- Warehouse staff
- Dispatch
- Admin

This should feed into:

- Payroll
- Time tracking
- Reporting
- Operational costing
- P&L

Inter-Company Transfers

Required screens:

- Transfer load
 - Transfer item/car
 - Transfer delivery section
 - Accept transfer
 - Reject transfer
 - View chain of custody
-

Global Front-End Layout

Standard Desktop Layout

Left Sidebar

Used for main navigation.

Common items:

- Dashboard
- Loads
- Customers
- Staff
- Drivers
- Vehicles
- Trailers
- Warehouse / Yard
- Accounts
- Reports
- Settings

Top Bar

Used for fast actions.

Buttons:

- Global Search
- Create New
- Notifications
- Messages
- Branch Selector
- Profile
- Help / Support

Global Search Must Search

- VIN

- Rego
 - Stock number
 - Customer reference
 - Load ID
 - Driver
 - Customer
 - Destination
 - Current location
 - Status
 - Required delivery time
 - Suburb/postcode
-

1. Super Admin Panel

Purpose

The Super Admin manages the Hero SaaS platform, companies, subscriptions, feature access, billing, support and white-label settings.

Sidebar

- Platform Dashboard
- Companies
- Subscriptions
- Membership Plans
- Feature Access
- White Label
- Support Tickets
- Billing
- System Analytics
- Inter-Company Transfers
- AI Controls

- Settings

Dashboard Layout

Top cards:

- Active companies
- Trial companies
- Paid companies
- Monthly revenue
- Failed payments
- Support tickets
- Active users
- Platform usage

Main sections:

- Company table
- Subscription health
- Support queue
- Feature usage
- System alerts

Buttons

- Add Company
- Suspend Company
- Reactivate Company
- Login as Company
- Create Plan
- Edit Plan
- Change Subscription
- Enable Feature
- Disable Feature
- Manage White Label

- View Billing
- View Support Ticket
- View Transfer Chain
- Export Report

Explanation

This panel is only for the Hero platform owner. It should not be confused with a transport company admin panel.

2. Sales Panel

Purpose

The Sales panel manages leads, demos, trials, proposals and conversion into paying transport companies.

Sidebar

- Sales Dashboard
- Leads
- Pipeline Board
- Demo Bookings
- Trial Companies
- Proposals
- Follow-Ups
- Onboarding Handover
- Sales Reports
- Settings

Dashboard Layout

Top cards:

- New leads
- Demos booked
- Trials active
- Proposals sent

- Deals won
- Deals lost
- Pipeline value

Main layout:

- Left: Kanban pipeline
- Right: selected lead details
- Bottom: follow-up tasks

Pipeline Columns

- New Lead
- Contacted
- Demo Booked
- Demo Completed
- Trial Started
- Proposal Sent
- Negotiation
- Won
- Lost

Lead Detail Fields

- Company name
- Contact name
- Email
- Phone
- Fleet size
- Transport niche
- Current software
- Pain points
- Estimated value
- Notes

- Next follow-up date

Buttons

- Add Lead
- Assign Sales Rep
- Book Demo
- Start Trial
- Recommend Plan
- Send Proposal
- Convert to Company
- Mark Won
- Mark Lost
- Add Note
- Schedule Follow-Up
- Send Email
- Call Lead
- Create Onboarding Task
- Send Onboarding Handover

Explanation

When a lead is won, Sales should be able to convert the lead into a transport company account and hand it over to onboarding.

3. Transport Company Admin Panel

Purpose

This is the main admin panel for each transport business using Hero.

Sidebar

- Company Dashboard
- Branches
- Loads

- Dispatch
- Customers
- Drivers / Staff
- Vehicles
- Trailers
- Warehouse / Yard
- Workforce / Rostering
- Availability / Leave
- Accounts
- Payroll
- Expenses
- Expense reminders and alerts automatically
- Asset Register
- Customer Instructions
- Inter-Company Transfers
- Reports
- Permissions
- Settings – Profile (with logos), Subscriptions

Dashboard Layout

Top cards:

- Active loads
- Completed loads
- Revenue
- Expenses
- Gross margin
- Available drivers
- Vehicles active

- Overdue invoices

Branch selector:

- All branches
- Individual branch selection

Buttons

- Add Branch
- Edit Branch
- Add User
- Assign User to Branch
- Create Role
- Set Permissions
- Add Vehicle
- Add Trailer
- Add Customer
- Add Asset
- Add Availability
- Add Leave
- Assign Shift
- Configure Niche Fields
- Add Customer Instructions
- Add Address Instructions
- Transfer Load
- Accept Transfer
- Reject Transfer
- View Branch P&L
- Export Report

Explanation

This panel manages the company setup, branch structure, users, assets, settings, payroll, reports and permissions.

4. Dispatch Panel

Purpose

Dispatch controls daily operations, load creation, planning, assignment, GPS tracking, driver communication and urgent job handling.

Sidebar

- Dispatch Dashboard
- Create Load
- Load Inbox
- Active Loads
- Planning Board
- Live GPS Map
- Drivers
- Vehicles / Trailers
- Customers
- Yard / Warehouse
- Workforce Availability
- Messages
- Reports

Dashboard Layout

Recommended layout:

- Left: load list
- Centre: planning board
- Right: live GPS map
- Bottom: driver status bar

Filters

- Branch

- Status
- Driver
- Customer
- Destination
- Required date
- Niche type
- Vehicle/trailer
- Available workers

Create Load Flow

1. Create load header
2. Add stops
3. Add items/cars
4. Link items to pickup/drop stops
5. Link items to customer
6. Assign driver
7. Assign truck
8. Assign trailer
9. Add documents/photos
10. Review
11. Activate / Dispatch

Buttons

- Create Load
- Save Draft
- Add Stop
- Reorder Stops
- Add Item
- Add Vehicle
- Link Customer

- Assign Driver
- Assign Truck
- Assign Trailer
- View Available Drivers
- View Unavailable Drivers
- Assign Shift
- Upload Document
- Add Internal Note
- Review Load
- Activate Load
- Dispatch Load
- Optimise Load
- Search by VIN
- Search by Rego
- Search by Destination
- Swap Trailer
- Record Trailer Change Reason
- Transfer Load
- Transfer Item
- View Chain of Custody
- View Customer Instructions
- View GPS History
- Message Driver
- Call Driver

GPS Buttons

- View Live Map
- Track Driver
- Open Route

- Send Location to Driver
- Refresh GPS
- View Location History
- Flag Delay

AI Load Inbox Buttons

- Review AI Extract
- Confirm AI Load
- Create Draft Load
- Match Customer
- Match Address
- Confirm Stops
- Confirm Items
- Reject Inbox Item
- Assign to Dispatcher

Explanation

Dispatch should control planning and assignment only. Dispatch should not perform driver physical actions such as arrive, pickup, deliver or signature capture.

5. Driver Panel

Purpose

The Driver panel is a mobile-first workflow for completing assigned jobs step by step.

Mobile Home Layout

Top card:

- Current job
- Next job
- Job status
- Pickup/drop location
- Next action

Main buttons:

- Start Work
- Finish Work
- Jobs
- Create Draft Load
- Add Expense
- My Pay
- Contact Dispatch

Floating communication button:

- Call Dispatch
- Message Dispatch
- Voice Note
- Voice-to-Text

Driver Workflow

1. Start Work
2. Confirm truck/trailer
3. Upload odometer photo
4. Complete compliance
5. Accept job
6. Navigate
7. Arrive at stop
8. Pickup
9. Scan/select items
10. Upload photos
11. Capture damage
12. Capture signature
13. Leave stop
14. Deliver

15. Final photos/signature

16. Complete stop/load

17. Finish Work

Buttons

- Start Work
- Confirm Truck
- Change Truck
- Confirm Trailer
- Change Trailer
- Upload Odometer Photo
- Confirm AI Odometer Reading
- Complete Compliance
- Submit Compliance
- Accept Job
- Navigate
- Arrived
- Start Pickup
- Scan Item
- Add Photo
- Mark Damage
- Capture Signature
- Complete Stop
- Start Delivery
- Complete Load
- Add Expense
- Upload Receipt
- Take Tap Payment
- Send Receipt

- Open Job Chat
- Message Driver
- Contact Dispatch
- Create Draft Load
- Submit Draft for Review
- Finish Work

Explanation

Driver actions must happen per stop, not just per load. At each stop, the driver should only see the items assigned to that stop.

6. Warehouse / Yard Management Panel

Purpose

This panel manages stock, cars, freight, yard locations, warehouse zones, holding areas, load lanes, scanning and movement history.

Sidebar

- Dashboard
- Inbound
- Outbound
- Current Stock
- Yard / Warehouse Map
- Holding Areas
- Load Lanes
- Scanning
- Labels
- Movements
- Reports

Layout

Use a split layout:

- Left: stock/item table

- Centre: yard or warehouse map
- Right: selected item details

Buttons

- Add Location
- Add Holding Area
- Add Load Lane
- Scan In
- Scan Out
- Scan by Barcode
- Scan by QR
- Manual Entry
- Move Item
- Move to Holding Area
- Move to Load Lane
- Assign to Load Lane
- Print Label
- Reprint Label
- View Asset History
- View Movement History
- Report Missing Item
- Export Stock List

Car Carrying Yard Fields

- VIN
- Rego
- Stock number
- Make/model
- Current yard location
- Load lane

- Destination
- Customer
- Status

General Freight Warehouse Fields

- Item number
- Pallet count
- Weight
- Dimensions
- Barcode/QR
- Zone
- Aisle/bin
- Customer
- Destination
- Status

Explanation

Cars/items must exist as assets independent of loads. Yard and warehouse movements must be tracked even before the item is assigned to a load.

7. Yard Attendant / Warehouse Attendant Panel

Purpose

Mobile-first panel for staff physically scanning, moving, loading and confirming items.

Mobile Layout

Top:

- Start Work
- Finish Work
- Assigned tasks
- Scan button

Main cards:

- Move item
- Scan into location
- Scan out of location
- Load lane assignment
- Report issue

Buttons

- Start Work
- Finish Work
- View My Tasks
- Scan Item
- Scan VIN
- Scan Barcode
- Scan In
- Scan Out
- Move to Location
- Move to Load Lane
- Confirm Location
- Confirm Loaded
- Confirm Unloaded
- Upload Proof Photo
- Report Damage
- Report Missing Item
- Add Note
- Contact Supervisor

Explanation

This panel should be simple, fast and mobile/PDA friendly. The attendant should not need full admin access.

8. Accounts Panel

Purpose

Accounts manages invoice review, invoice sending, payments, payroll, contractor pay, expenses, GST/PAYG and P&L.

Sidebar

- Accounts Dashboard
- Invoice Review
- Sent Invoices
- Payments
- Payroll
- Contractor Pay
- Employee Pay
- Expenses
- GST / PAYG
- P&L
- Vehicle Costs
- Reports

Dashboard Layout

Top cards:

- Draft invoices
- In review
- Sent invoices
- Paid invoices
- Overdue invoices
- Payroll due
- Expenses pending
- Gross margin

Invoice Table Columns

- Invoice number
- Customer
- Load ID
- Items
- Amount
- GST
- Status
- Due date

Buttons

- Review Invoice
- Edit Invoice
- Approve Invoice
- Send Invoice
- Mark Paid
- Record Payment
- Match Payment to Invoice
- Cancel Invoice
- Export PDF
- Send Statement
- Configure Billing Rate
- Configure Worker Pay Rate
- Review GST
- Review PAYG
- Review Expense
- Approve Expense
- Approve AI Receipt
- Reject AI Receipt
- Process Contractor Pay

- Process Employee Pay
- Export Payroll
- View Load Profit
- View Vehicle Costs
- View P&L

Explanation

Invoices must be created per customer and reviewed before sending. Worker pay must be separate from customer billing.

9. Customer Panel

Purpose

Customers can view their own jobs, track deliveries, access documents, view invoices and submit load requests.

Sidebar

- Dashboard
- My Loads
- Track Delivery
- Documents
- Invoices
- Payments
- Load Requests
- Support
- Settings

Dashboard Layout

Top cards:

- Active jobs
- Delivered jobs
- Pending invoices
- Paid invoices

- Open requests

Buttons

- View Load
- Track Delivery
- Download POD
- Download Invoice
- Pay Invoice
- Invoice reminders
- View Payment History
- Submit Load Request
- Upload Document
- Add Delivery Address
- Edit Delivery Instructions
- Contact Support
- View History

Explanation

Customers should only see their own loads, invoices and documents. They should not see other customers or internal company financials.

Final Developer Note

The platform must feel like a live logistics operating system, not just an admin dashboard.

Every screen should clearly answer:

- What needs to move?
- Where is it now?
- Who is responsible?
- What is the next action?
- Has it been delivered?

- Has it been invoiced?
- Has the worker been paid?
